

Locally powered energy innovation.

**Notification: Important Change to Your Smart Energy Program Account**

Dear Valued Customer:

Beginning February 1, 2019, Clean Power Alliance will be the new electricity generation provider for your area. Clean Power Alliance is the new, locally controlled electricity provider in Southern California. We are proud to bring clean, renewable power choices to communities across Los Angeles and Ventura Counties.

The purpose of this letter is to let you know about Clean Power Alliance and how our launch may impact your participation in Southern California Edison (SCE)'s Smart Energy Program. Our records indicate that your account(s) is enrolled in SCE's optional Smart Energy Program, which allows you to earn bill credits by participating in smart thermostat events. We want to ensure that you can continue to receive bill credits for participating in smart thermostat events while also benefiting from the advantages of Clean Power Alliance. We are currently working with qualified Smart Thermostat Service Providers and hope to bring our customers a similar program in time for the 2019 summer season.

In the meantime, your participation in the SCE Smart Energy Program is scheduled to end and your account(s) is set to be automatically enrolled in Clean Power Alliance in February 2019.

We will notify you once Clean Power Alliance's new program becomes available so that you can take the necessary steps to transfer your qualified Smart Thermostat and continue saving money with your device.

With Clean Power Alliance, nothing changes about your electric service other than who procures your electricity generation. SCE will continue to deliver power, send one bill, and be responsible for resolving any electricity service issues. There are no duplicate or double charges and Clean Power Alliance charges simply replace what SCE would otherwise charge you for generation. When your service account(s) listed in the table below transfers to Clean Power Alliance, SCE and Clean Power Alliance will work together closely to continue providing your electricity service.

*This table may not list all of your accounts.*

With Clean Power Alliance, you can choose the electricity option that is best for you. Although you will automatically be enrolled in <X>, you will soon have the opportunity to choose between the following Clean Power Alliance rate options:

- **Lean Power**, which provides 36% renewable energy at the lowest possible cost.
- **Clean Power**, which provides 50% renewable energy at cost-competitive rates.
- **100% Green Power**, providing 100% renewable energy and the opportunity to lead the way to a greener future.

In addition to offering stable, competitive rates and higher renewable content, Clean Power Alliance also has the benefit of being locally controlled. We are dedicated to serving our communities' diverse energy needs, while ensuring you continue to have access to the same reliability, billing, and support.

If you decide that Clean Power Alliance is not the right choice for you right now, you have the right to opt out at any time<sup>1</sup>. Clean Power Alliance will not charge you any fees for opting out and remaining with SCE and the Smart Energy Program, although you will not be able to enjoy the many advantages of Clean Power Alliance. You can opt out by visiting [cleanpoweralliance.org/opt-out](http://cleanpoweralliance.org/opt-out) or calling us at 888-585-3788 (TTY 323-214-1296). We are grateful for the opportunity to provide you with choices for your energy.

To learn more about Clean Power Alliance's program or rates, please contact us at 888-585-3788 (TTY 323-214-1296) or at [customerservice@cleanpoweralliance.org](mailto:customerservice@cleanpoweralliance.org). We would love to hear from you!

If you have any questions regarding SCE's service, related programs or rate options, please contact SCE's Customer Contact Center at 800-974-2356.

Sincerely,

Account Services  
Clean Power Alliance

### **Smart Energy Program**

*Southern California Edison (SCE)'s Smart Energy Program offers residential customers that have a qualifying Smart Thermostat an opportunity to earn monthly bill credits. When electricity demand and prices climb during summer months, SCE may activate Smart Energy Program events, during which SCE will notify your Smart Thermostat Service Provider to adjust the temperature setting on your thermostat to limit A/C usage. Qualified participating customers can earn annual Capacity Bill Credits for maintaining enrollment in the program, as well as Energy Bill Credits for energy usage reductions during events. Qualified Smart Thermostat Service Providers may refer to the Smart Energy Program by a different brand name such as Smart Savers SoCal or Rush Hour Rewards.*
